

Pôle Mer Méditerranée

SEA INNOVATION AND BUSINESS CLUSTER

Serving the marine sector

Sustainable development for the marine and coastal economy

- **Our "ambition"** : Develop the maritime economy and the employment by the innovation
- **Our "job"** : Encourage and support the development of innovative collaborative projects associating companies and research laboratories

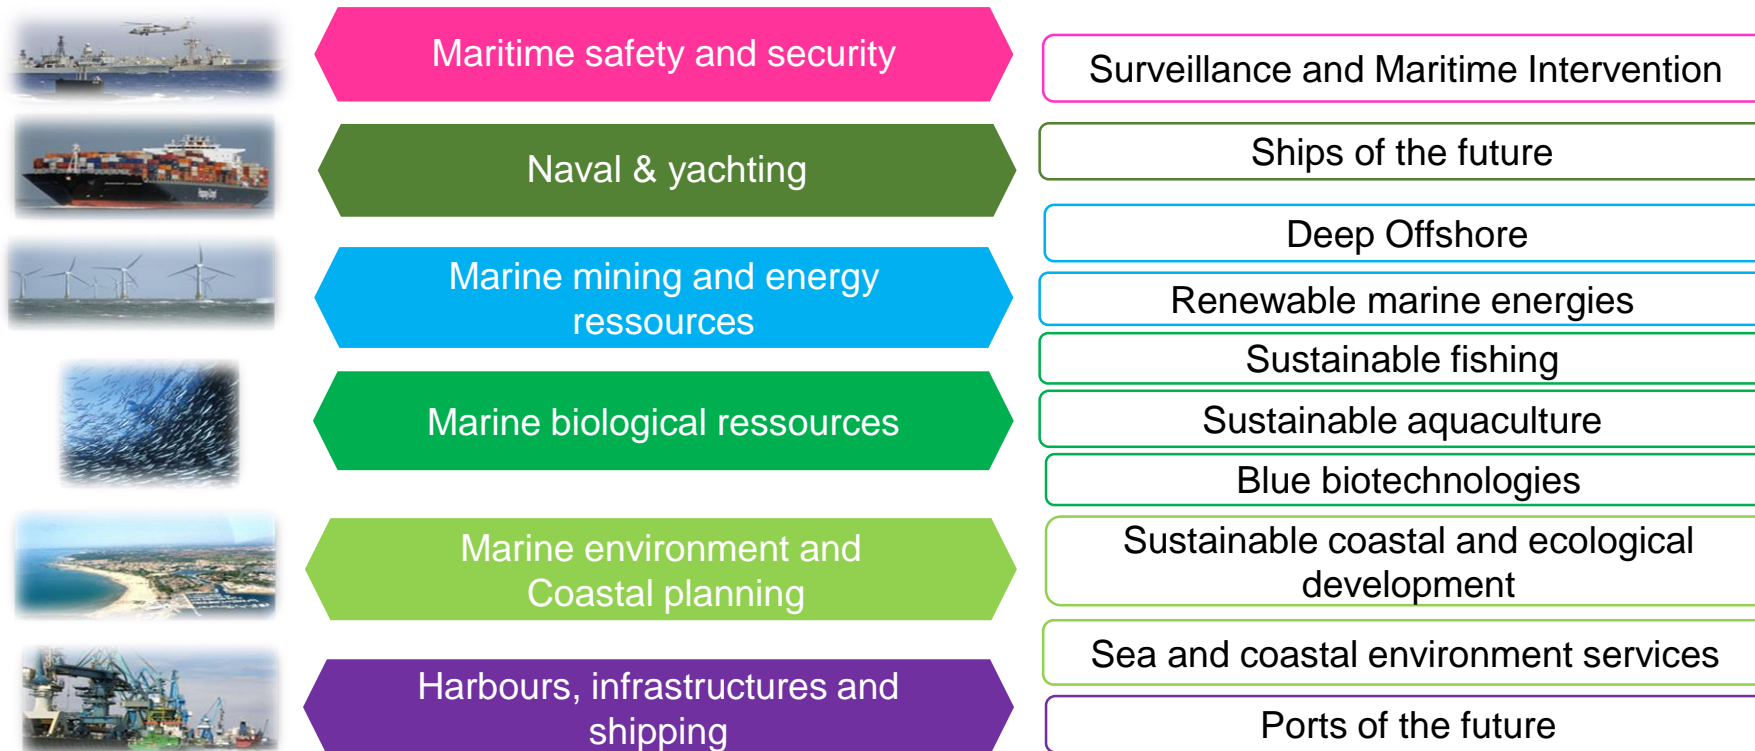

Innovation as a driver

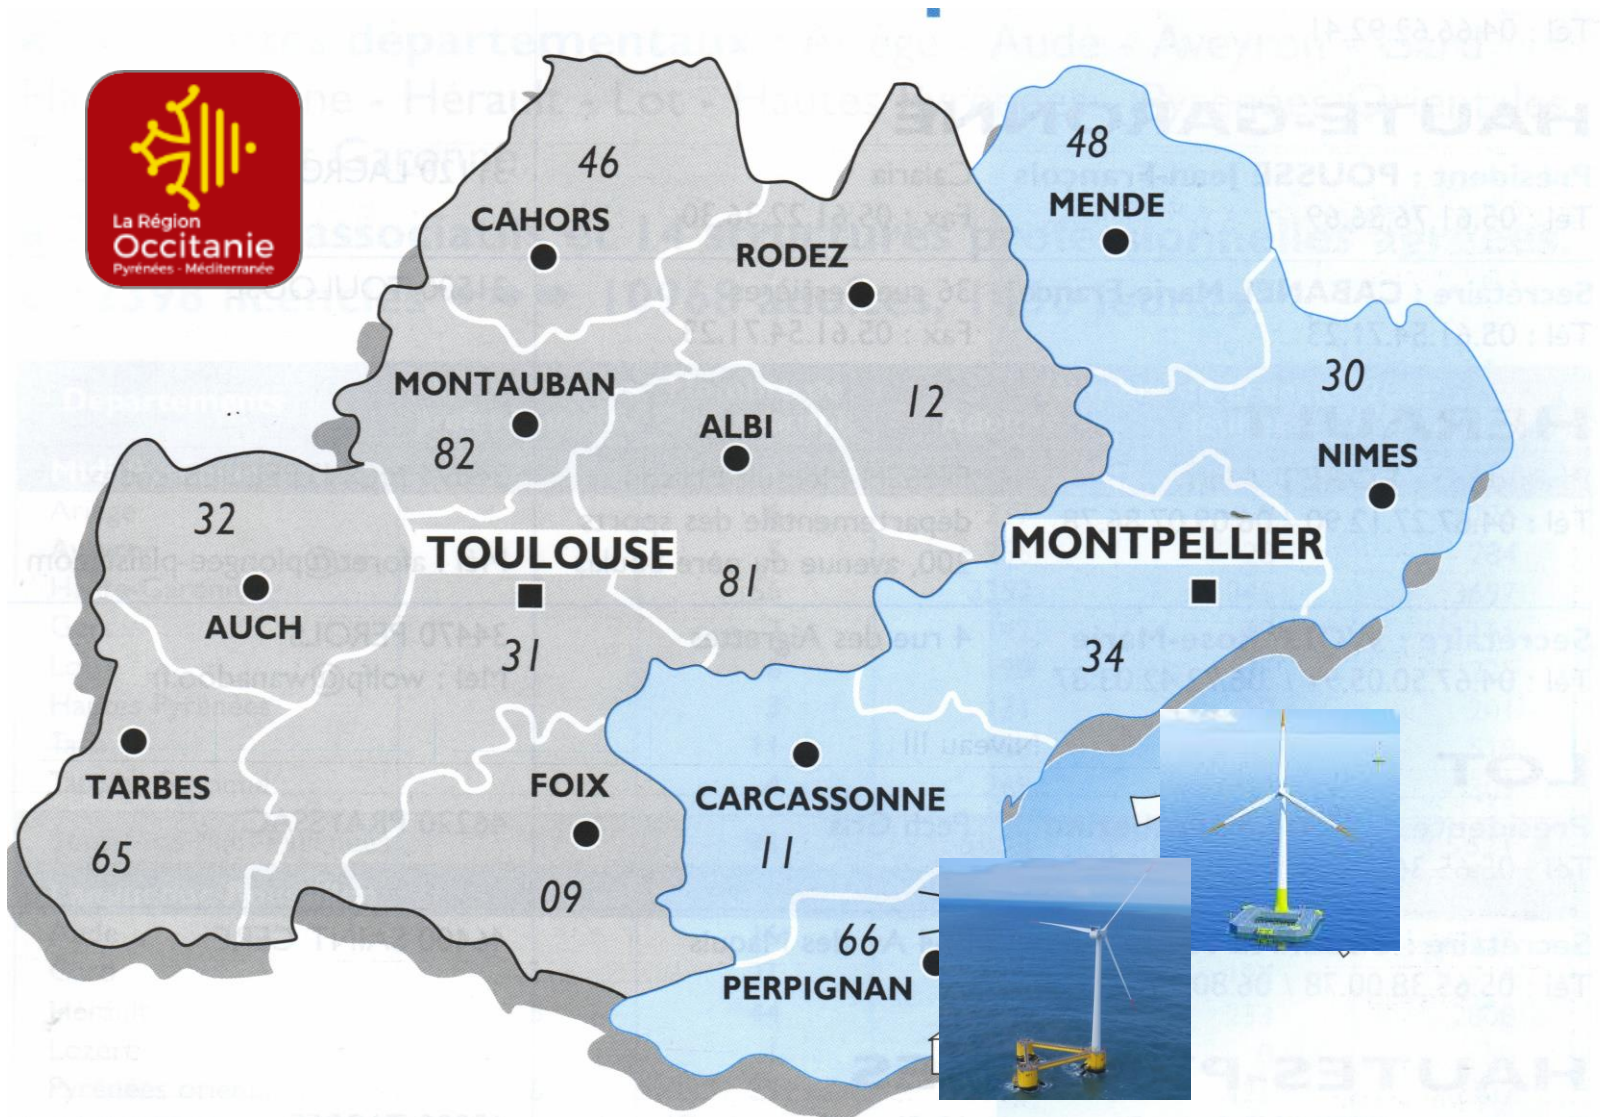

- Build a network of skills linking industry and research laboratories
- Promote the emergence and creation of innovative projects
- Raise public and private financing
- Promote innovative products and services from accredited projects
- Support access to national and international markets

6 Strategic Business Areas and 10 Market Oriented Programs

Floating offshore wind farm in Occitanie

2 pilot farms of 4 turbines in 2021

A voluntary regional policy

PMM :

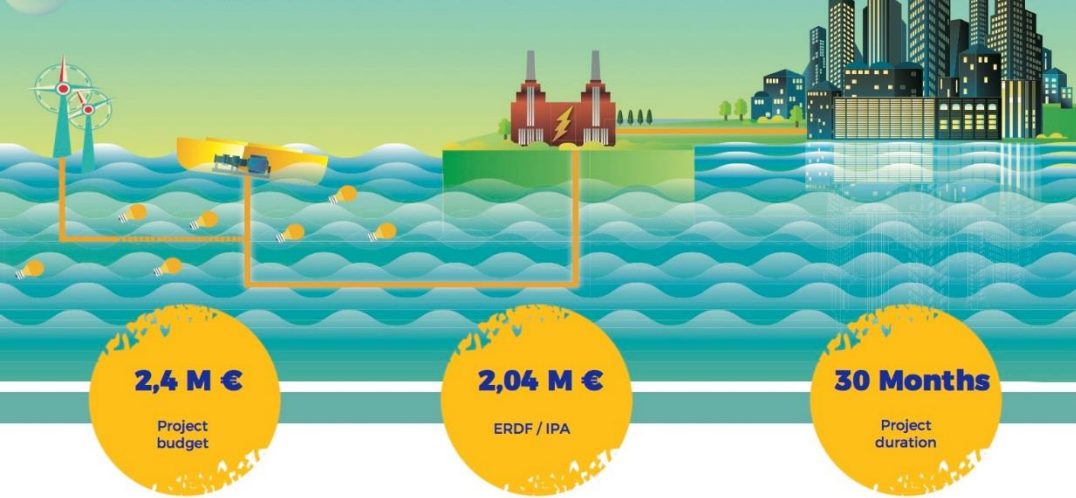

- brings knowledges and network
- made a mapping of actors & skills
- Co-organizes the FOWT conference

PELAGOS

Promoting innovative nETworks and cLusters for mARine renewable energy synerGies in mediterranean cOasts and iSlands

To increase transnational activity of innovative clusters and networks of key sectors of the MED area

PELAGOS aims to develop smart and sustainable growth by enhancing a transnational MED Cluster in the Blue Energy sector and by facilitating the distribution of targeted solutions and products specifically calibrated for the Mediterranean region.

PELAGOS offers support to the relevant stakeholders by promoting knowledge sharing in R&D, and by enhancing social acceptance. It inter-connects technology and service providers, large enterprises, power distributors, financial operators, policy makers, administrative bodies, NGOs, and citizens.
