On and Off the Maps  
video installation

John Logie Baird pointed his camera at a Maltese Cross in Soho London, and demonstrated television for the first time in Britain. Almost exactly 400 years earlier Durer had published illustrations of four drawing machines in his Treatise on Measurement. The installation uses these sources to write another chapter on the history of the love affair between television and "the gentle irony of objects."

The artist gratefully acknowledges the financial help of the Arts Council
