On and Off the Maps is a collaborative work made by video artist Steve Hawley and composer Jane Wells, and takes as its starting point the geometric series of the 13 C. mathematician Fibonacci. Mother and Son develops the imagery and visual qualities of Steve Littman's earlier tapes and installations such as I Want (1983). New York New York is both a literal record of a journey on the Staten Island Ferry, and a metaphorical exploration of our notions of travel and the expectations we bring to places we visit.
