

SOPHIST

SOtagliflozin in Patients with HearFailure Symptoms and Type 1 Diabetes

The SOPHIST trial is examining if a tablet called sotagliflozin, can improve quality of life in people with type 1 diabetes and heart failure symptoms.

Do you have Type 1 Diabetes and either a heart condition, symptoms such as breathlessness or fatigue or are taking a water tablet?

Do you use a continuous glucose monitor?

Are you interested in taking part in Clinical Research?

If you would like any more information or are interested in taking part, please contact the trial team by:
